

HARVESTING/PROCESSING HEADS

400 SERIES

**It's no coincidence
that Waratah has been
an industry-leader
for more than 50
years. Because we've
always listened to
you to design durable,
more productive and
efficient harvesting
and processing
heads proven for your
application.**

At our facilities in Finland and New Zealand, each head is made to order, so you get exactly what you need. Our heads are built to work with advanced technology providing precise control with accurate diameter and length measuring. With on-site facility testing, each product is proven on our time to be profitable on yours.

Our commitment to your success goes beyond product quality. When you put our heads to work, our global support network goes to work for you – from helping you choose the right head, to installation and startup, to being on site when you need us.

We offer the widest range of harvester/processor heads on the market. So whether you're harvesting at the stump, processing at the landing or somewhere in between, Waratah is built to work for you all over the world.

**"Our production is great with Waratah.
The uptime is second to none"**

**Drew Betts
Owner, Clay Hill Equipment**

400 SERIES

Proven in mixed stand and multi-tree harvesting applications, Waratah 400 Series harvesters balance production with precision.

High-tensile steel frames engineered for maximum performance, while providing good visibility to the tree

Stump treatment and color marking spray options

High performance saws with ample cutting capacity and automatic control for optimum performance in harvesting applications

Saw box designs to improve productivity and extend durability offering low stump heights

Delimb knives provide the best possible delimbing for large- and small-diameter wood

Large knife and feed roller openings for fast stem catching and productive tree harvesting

Superior tree holding, log handling, and processing of straight and crooked trees

Rotator options to suit many carriers

Multi-tree harvesting options for some models

**Several junction box configurations
available to suit many applications**

Advanced on-board controller and diagnostics

**Highly efficient , high performance valves
providing responsiveness and speed**

**Dual diameter sensors
for accurate log volumes,
assortments, and providing
optimum head performance**

**Optional top saw on some models
increases productivity**

**Fixed and floating front knife
options for many applications
providing optimum delimbing
coverage**

**Extreme measuring accuracy with the
latest sensor technology and many
measuring wheel options**

**Specialized guarding packages for snow
and harsh applications**

**High torque high performance
feed motor options**

**Drive wheel options for optimum wood
quality, debarking or maximum traction
in crooked wood**

H423

If you're looking for a top producer in a variety of wood sizes, the H423 is well-suited for the task. It has superb delimbing performance in all diameters, outstanding multi-tree harvesting qualities and an excellent power-to-weight ratio, taking productivity to a higher level.

OVERVIEW

Harvesting in early-to-late thinnings

APPLICATIONS

Softwood harvesting
Multi-tree harvesting

RECOMMENDED RANGE

4-50 cm / 1.6-19.7 in.

SPECS

955 kg / 2,105 lb.
Weight (Without Rotator & Link)

28 MPa / 4,061 psi
Maximum Hydraulic Requirements

560 mm / 22.0 in.
Max Upper Delimb Opening

560 mm / 22.0 in.
Max Feed Roller Opening

580 mm / 22.8 in.
Maximum Cutting Capacity

14-20 metric ton
Carrier Size

13-21 metric ton
Carrier Size

H424

Characterized by its consistent performance and skill set in second thinnings and early regeneration cuttings, the versatile H424 is equally suited for processing or debarking applications. With a durable frame, well-protected hosing, feed power and ample cutting capacity, it's a very capable all-around head for mid-sized harvesters.

OVERVIEW

Harvesting in early and second thinnings; early regeneration harvesting.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting
Processing
Debarking

RECOMMENDED RANGE

4-57 cm / 1.6-22.4 in.

SPECS

1105 kg / 2,436 lb.

Weight (Without Rotator & Link)

28 MPa / 4,061 psi

Maximum Hydraulic Requirements

610 mm / 24.0 in.

Max Upper Delimb Opening

430 mm / 17.0 in.

Delimbing Diameter Tip-to-Tip

640 mm / 25.2 in.

Max Feed Roller Opening

620 mm / 24.4 in.

Maximum Cutting Capacity

17-22 metric ton

Carrier Size

16-21 metric ton

Carrier Size

H425

Optimizing performance, productivity and delimbing, the H425 excels in large diameter regeneration harvesting. With a powerful control valve and feed-roller arm geometry that ensures a solid grip, log control is only an afterthought.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting

RECOMMENDED RANGE

5-65 cm / 2-25.6 in.

SPECS

1360 kg / 2,998 lb.
Weight (Without Rotator & Link)

28 MPa / 4,061 psi
Maximum Hydraulic Requirements

680 mm / 26.8 in.
Max Upper Delimb Opening

680 mm / 26.8 in.
Max Feed Roller Opening

710 mm / 28.0 in.
Maximum Cutting Capacity

18-25 metric ton
Carrier Size

20-25 metric ton
Carrier Size

H425HD

The rugged H425HD is built to work on your toughest jobs. A heavy-duty tilt frame, feed motors and guarding provide even more durability. With a powerful control valve and a top saw option, this high-performance head will become your top choice for wheeled carrier applications.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting

RECOMMENDED RANGE

5-65 cm / 2-25.6 in.

SPECS

1390 kg / 3,064 lb.

Weight (Without Rotator & Link)

28 MPa / 4,061 psi

Maximum Hydraulic Requirements

680 mm / 26.8 in.

Max Upper Delimb Opening

680 mm / 26.8 in.

Max Feed Roller Opening

710 mm / 28.0 in.

Maximum Cutting Capacity

18-25 metric ton

Carrier Size

20-25 metric ton

Carrier Size

H425X

Equally comfortable on track machines, the H425X comes equipped with an extreme duty main saw box and excels in mixed stand harvesting. With a powerful control valve, high-performance drive motors, precision delimbing and optional top saw, “backing up” will not be in your vocabulary.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting

RECOMMENDED RANGE

5-65 cm / 2-25.6 in.

SPECS

1426 kg / 3,143 lb.
Weight (Without Rotator & Link)

28 MPa / 4,061 psi
Maximum Hydraulic Requirements

680 mm / 26.8 in.
Max Upper Delimb Opening

680 mm / 26.8 in.
Max Feed Roller Opening

710 mm / 28.0 in.
Maximum Cutting Capacity

18-25 metric ton
Carrier Size

20-25 metric ton
Carrier Size

H427

The rugged H427 delivers performance, durability and precision for big timber. With heavy-duty features and a large capacity, this powerhouse head is made for late thinnings to the final cut.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting

RECOMMENDED RANGE

5-70 cm / 2-27.6 in.

SPECS

1655 kg / 3,649 lb.
Weight (Without Rotator & Link)

28 MPa / 4,061 psi
35 MPa / 5,076 psi
Maximum Hydraulic Requirements

720 mm / 28.3 in.
Max Upper Delimb Opening

720 mm / 28.3 in.
Max Feed Roller Opening

760 mm / 29.9 in.
Maximum Cutting Capacity

18-25 metric ton
Carrier Size

20-30 metric ton
Carrier Size

H427X

The tough H427X is purpose-built for tracked machine applications. With a standard, heavy-duty tilt frame and heavy-duty feed motor covers, this powerful head delivers durability for extreme harvesting.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting
Mixed stand (hardwood and softwood) harvesting
Multi-tree harvesting

RECOMMENDED RANGE

5-70 cm / 2-27.6 in.

SPECS

1853 kg / 4,085 lb.

Weight (With topsaw, HD tilt and feed motor covers)

28 MPa / 4,061 psi

35 MPa / 5,076 psi

Maximum Hydraulic Requirements

720 mm / 28.3 in.

Max Upper Delimb Opening

720 mm / 28.3 in.

Max Feed Roller Opening

760 mm / 29.9 in.

Maximum Cutting Capacity

18-25 metric ton

Carrier Size

20-30 metric ton

Carrier Size

MEASURING AND CONTROL SYSTEMS

We focus on providing you with accurate diameter and length measuring systems for profitable precision. Simplify operations and boost productivity with real-time statistics and measuring information, and wireless data transfer.

TIMBERRITE™ H-16

TimberRite H-16 elevates control while providing connectivity to keep you in the know. Using CAN-bus carrier communication, this easy-to-use system provides configurable and precise head control to increase efficiency and productivity.

If access to information is your game, connectivity options are available – supporting real-time information for online mapping/site monitoring, analytics, automated wireless data transfer or emails, or work and repair statistics for productivity monitoring.

On-screen production information and reports can be configured, with the latest StanForD file structures supported ensuring data can interchange with virtually any professional system in the forest industry. Additionally, the system has advanced diagnostic capabilities including remote access.

Configurable as either a pre-selection assortment prioritization system or the optional value-based bucking optimization system, TimberRite H-16 can offer solutions to meet any market needs.

KEY FEATURES

- **Onboard online mapping** - (optional) - access your location and visualize your production data.
- **Pre-Selection Priority** - (standard) - sequential optimization by cutting list instruction, and alternate log assignments.
- **Value Optimization** - (optional) - value-based optimization, intuitive prognosis through intelligent assessment of advanced matrices.
- **Touch-screen display**, or wireless keyboard and touch pad mouse.
- **Windows™ PC** - based controller integrates the harvester head measuring and control system with the high processing power of a personal computer.
- **StanForD 2007 or 2010** file structure compatibility ensures data interchanges with other professional systems in the forest industry.
- **Email and automatic file sending** - production reports, worksite instructions, repair follow-ups, calibration history, log tables, machine settings and harvesting instructions.
- **Telematics options using optional onboard solutions or WaratahMate™ smartphone app** - Easily transfer data wirelessly regardless of location, or through email via phone USB.
- **Work & repair statistics** - Monitor uptime, productivity and operating costs.
- **Species specific calibration and soft-clamping** settings for delimb and drive arms.
- **Operator specific settings** and configurable menus for quick navigation and adjustments.
- **Extensive site documentation** - expanded site, contractor, and machine information.
- **Simplified diagnostics** - input and output tests with built-in diagnostic troubleshooting assistance.

OPTIONS

Waratah heads are configurable to your application.
Consult your dealer for option availability.

Configurability

Waratah has a wide range of focused options for harvesting and processing applications including single- and multi-stem processing, multi-tree handling, and all models include options for softwood, crooked hardwood and debarking.

Color Marking

Waratah offers nozzle-applied color marking systems to simplify log identification. Three colors provide many assortment combinations improving sorting and yard safety.

Main Saws, Saw Motors, Top Saws

The 400 series have high-cutting capacity, main saws with saw boxes designed for quick cross cutting. All saw units have auto tensioning 0.404 pitch chain driven by efficient, high torque motors. Additionally, the H425HD, H425X, H427 and H427X models have an optional top saw for extra efficiency in crooked wood applications.

Measuring Wheels

Application-specific measuring wheels are engineered for accurate and consistent measuring in all tree species with enhancements for log quality. Selections include wide and narrow models, coarse and fine teeth options, and multi-stem, debarking configurations.

Delimb Arms

Delimb arms are engineered for fast stem catching and durability in the toughest applications. Knife profiles ensure quality delimbing throughout the recommended diameter range.

Rotators

Waratah offers high torque and productive rotator motor and hose bulkhead options on all of the 400 series models.

Feed Rollers

Many feed roller options are available for a variety of applications, offering improved traction and reducing fiber damage. Wheel options include eucalyptus debarking, rib, v-type, MTH, Moipu, MenSe, thumbnail, aggressive and many combination styles.

Multi-tree Harvesting

Select models have multi-tree harvesting (MTH) capabilities, providing superior accumulating and precise bundle feeding with the option. MTH ability increases productivity and can easily be installed between the rotator and hanging bracket – even on existing heads.

Front Knives

Waratah offers heavy-duty floating or fixed front knife options with specialized profiles and cutting edges for superior delimbing in any application.

Stump Treatment

Waratah has nozzle or bar-applied stump treatment kits.

Talk to your Waratah dealer about more available options.
